Work Experience

07.2023 - 07.2024
Company Name I Karat team
Front-end developer

Realized an online store with a full 0. With a database. And the output of product cards. Where on 1 page is the rendering of goods depending on the selected. Fully working and ready to use. Linked it with CRM system. Where orders come. On pure HTML, CSS, JS. There is in the portfolio in the commercial work. (Shop Karat)
Linked 3 services. With data processing via API. CRM, GooglShets, Keitaro. For interaction between orders and their statuses. And also CRM system with "Novaya Posta" and changing the shelf life of certain goods. As well as interaction with telegram bots. And solved various business problems of different plan and with different technology stack such as PHP, SQLite, WordPress. Since I was the only developer in the company.

07.2022 - 02.2023

Company Name I Platora
Front-end developer

had to work with technologies such as :
HTML, CSS, JS, Bootrstrap, JQuery. Developed Frontend part for a large multi-page online store. I developed responsive, created forms, modal windows, carousels, menus, worked with map api using HTML, CSS, JS, Bootstrap
